<b>What is the most urgent problem facing your jurisdiction?</b>	<i>Retaining CityWide Diversity: We can develop without displacement. While I don't disagree we should welcome new residents to the District, it should not be at the expense of long-time working-class District residents. Wealthy suburbanites are moving into the new condos springing up everywhere and we wonder why this city is being squeezed of its color and culture. Couple this with rising housing costs and diminishing social services and we can see why more and more working-class families are being forced out. We must demand a moratorium on Condoization of the District until impartial impact surveys are completed.</i>
<b>Why should voters elect you?</b>	<i>Vote with the DC Statehood-Green party because we share values of working-class families: affordable housing, strong educational facilities, universal healthcare, prison reform and human rights.</i>
